

**Support the investments made under the Inflation Reduction Act and support policy solutions that will further prioritize health benefits.**

Dear Senator/Representative:

As health professionals, we've seen firsthand how an individual's environment can influence their health outcomes. Children with asthma are coming into the emergency room because they can't breathe in summer months when smog levels are highest. Newborns have low birth weight due to neurotoxins that are emitted by the power plant nearby. Families must evacuate when wildfires or flooding strike their neighborhood, leaving lasting mental health impacts.

The health community championed the passage of the Inflation Reduction Act in 2022 because of the benefits we expect to see in our exam rooms, clinics and communities. Investments in clean energy technology, funding for community projects that reduce air pollution and resources to bolster the resiliency of health care systems will improve the health of our patients and communities. Put simply, the investments Congress has made with this law will help safeguard our patients and the communities we serve and make our jobs more effective and impactful.

**We call on you to support the investments made under the Inflation Reduction Act and support policy solutions that will further prioritize health benefits. The health of our country depends on it.**

Sincerely,

The Undersigned Health Professionals
